Q1. What is JavaScript?

JavaScript is a scripting language used to make web pages interactive. Runs in browser + Node.js

2. Difference between Java & JavaScript?

Totally different languages

Java → OOP, compiled

JavaScript → Scripting, interpreted

Q3. var vs let vs const?

var → function scoped

let → block scoped

const → cannot be reassigned

```
var a = 10;
```

```
let b = 20;
```

```
const c = 30;
```

Q4. What is DOM?

Document Object Model – structure of the webpage JavaScript can access & modify.

Q5. What is Hoisting?

JavaScript moves declarations to top during execution.

Q6. Data types in JavaScript?

Primitive: string, number, boolean, null, undefined, bigint, symbol

Non-Primitive: object, array, function

Q7. What is == vs === ?

== → compares value

=== → compares value + type

```
2 == "2" // true
```

```
2 === "2" // false
```

Q8. What is a Function?

Reusable block of code.

Q9. Types of functions?

Normal function

Arrow function

Anonymous function

```
function add(a,b){ return a+b; }  
const addArrow = (a,b) => a+b;
```

Q10. Common Array Methods?

map(), filter(), reduce(), push(), pop()

```
let arr = [1,2,3];  
arr.map(x => x*2);
```

Q11. What is JSON?

JavaScript Object Notation – used to exchange data.

Q12. What is synchronous vs asynchronous?

Sync → executes line by line

Async → doesn't block flow (fetch, setTimeout)

Q13. What is Callback, Promise & async-await?

Callback → function inside function

Promise → future value

async-await → cleaner async code

```
async function getData(){  
  let res = await fetch(url);  
}
```

Q14. What is Event Loop?

Handles async operations in JS.

Q15. What is Closure?

Function + Lexical scope together.

Q16. What is this keyword?

Refers to current execution context.

Q17. How to select HTML elements?

`document.getElementById()`

`document.querySelector()`

Q18. Event handling?

`btn.addEventListener("click", function(){})`

Q19. Reverse a string

`console.log("hello".split('').reverse().join(''));`

Q20. Find largest number in array

`Math.max(...arr)`
